

CYBERSECURITY AWARENESS MONTH

October is Cybersecurity Awareness Month, making it the perfect opportunity to review your online security habits and learn how to better protect your financial information. GNB is proud to provide tools and resources that help you stay informed, connected, and secure.

How My Money Manager Can Help

Available within Online Banking, My Money Manager offers tools that can help you stay connected to your finances and quickly identify suspicious activity, including:

- Account aggregation and budgeting tools
- Transaction monitoring
- Account balance and spending notifications

Complete Your Cybersecurity Checkup

This Cybersecurity Awareness Month, take a few moments to strengthen your online security:

- Update your passwords and enable multi-factor authentication
- Review your account alerts and notification settings
- Verify your contact information is current

Watch for Common Scams

Scammers continue to use phishing emails, fraudulent text messages, and impersonation attempts to steal personal information. Be cautious of unexpected requests for account information, passwords, security codes, or urgent payments. Remember: GNB will never ask for your Online Banking password or security codes. If something doesn't seem right, contact us directly before taking action.

We're Here to Help

This Cybersecurity Awareness Month, take charge of your financial security and make cybersecurity part of your financial wellness routine.
